

I am concern that LPFM will display local air broadcasters providing programming that is not local or pertinent to our region. I believe that local radio station provide important information regarding our communities that outside radio stations cannot provide. They are not in tune or have a local interest in mind. They would not listen nor provide to the needs of the local community. How are they to take precedent over the local radio? Are they to come and make money from our community without putting anything into it?
